

IS CANADA NOW A NAZI STATE?

Posted on October 1, 2023 by W.O. Munce

Canada today is a monstrous Woke machine, finely calibrated to yield the globalist new world order of green economics and eugenics (aka, gender equality, transgenderism, euthanasia). This machine was constructed by the wildly popular Canadian prime minister, Pierre Eliot Trudeau, the father of Justin.

Political systems do not really disappear; they may fall into disuse for a while, until someone finds a use for them, and they reappear in a fresh iteration. Globalism is a fresh iteration of Nazism, for the two have the same core; they vary only in detail, because they must fit into the time-period in which they exist. Thus, the mistake often made by commentators is a lazy one, whereby Hitler and his Germany become the blueprint for comparison, while the core is never noticed, which defines both. What did Hitlerism seek to achieve? A purified humanity (eugenics), inhabiting a purified earth (environmentalism), a process facilitated by the state.

And what is the core of globalism? Less and better humans (eugenics), on an earth purified from the pollution of human activity (environmentalism).

Both Hitlerism and globalism function on the perfection-imperfection relationship—the former must continually seek out and destroy the latter. This is labeled “progress;” a better definition is the “great replacement,” in which anything marked as “imperfect” is to be replaced by the “perfect.” The agency doing the marking and the replacing is the state.

Eugenics for globalism is the marking of imperfect humanity (European, aka, “white”), which must be severely husbanded so that it can only exist on the margins. The perfect humanity is non-white, which must be given to dominate the earth. The only difference between Nazism and globalism is in the marking: “Jew” is now “white.” The end result is the same—the annihilation of humanity.

Canada is the chief architect and conniver in this globalist program—and thus Canada is now a Nazi state by another name (“democracy” and “our values”), for it seeks to achieve what eugenics and environmentalism will bring about—a green Hell—inhabited by non-white peoples bunched up from all over the world. The original Canadians of British and French origin (Old Stock Canadians), who built the Canada whose reputation whose glow yet lingers in people's minds, have largely disappeared, having been drowned in legalalized, mass migration (the government imports 1,000,000 people every year, from the third world into Canada; a vast number, given Canada's small population). And the finest enthusiast that this program has is Justin Trudeau.

To be clear, in the current Canadian political scene, all parties are complicit in the broader program of globalism—all will actively work to serve it well. It matters little whether the label is “liberal,” “conservative,” “green,” “socialist,” and even “communist”—none can escape the machine; rather, none want to. And Canada is eager to take this machine worldwide, for it has just launched [a UN declaration](#) to fight “disinformation.” Only people applauding [Waffen SS veterans](#) can really know what the truth is. Everyone else is the enemy.

In Canada, politically, there is only one glimmer of hope—[the People's Party of Canada](#), and its leader Maxime Bernier. But their biggest challenge is how to overcome the monstrous machine.
